

Teltam Translator – Testing Report

1. Test Overview

Application Tested: Teltam Translator

Modules Tested:

- User Registration
- User Sign In
- Text Translation
- Document Translation
- Speech Translation
- Live Camera OCR Translation

Testing Scope:

The application was tested in three scenarios:

1. Before Sign In (Website Interface)
2. After Sign In (Website Interface)
3. After Sign In (Dashboard)

2. Authentication Testing

Feature	Result	Remarks
Registration	Pass	Registration process is working correctly.
Sign In	Pass	User login functionality is working correctly.

3. Functional Testing Results

A. Text Translator

Test Scenario	Status	Remarks
Before Sign In (Website Interface)	Pass	Everything worked well.
After Sign In (Website Interface)	Pass	Everything worked correctly.
After Sign In (Dashboard)	Pass	Everything worked correctly.

Result: Text translation functionality is operating correctly in all tested environments.

B. Document Translator

Test Scenario	Status	Remarks
Before Sign In (Website Interface)	Pass	Everything worked well.
After Sign In (Website Interface)	Pass	Everything worked correctly.
After Sign In (Dashboard)	Fail	Document upload functionality is not working, preventing document translation.

Issue Identified:

- Document upload feature in the dashboard is not functioning.
 - Users are unable to upload documents for translation.
-

C. Speech Translator

Test Scenario	Status	Remarks
Before Sign In (Website Interface)	Pass	Everything worked well.
After Sign In (Website Interface)	Pass	Everything worked correctly.
After Sign In (Dashboard)	Partial Pass	Microphone recording is not working. Audio file upload works correctly.

Issues Identified:

- Microphone button is non-functional in the dashboard.
 - Users cannot record audio directly through the application.
 - Audio upload feature functions correctly.
-

D. Live Camera OCR Translator

Test Scenario	Status	Remarks
Before Sign In (Website Interface)	Pass	Everything worked well.
After Sign In (Website Interface)	Pass	Everything worked correctly.
After Sign In (Dashboard)	Pass	Everything worked correctly.

Result: Live Camera OCR translation feature is functioning properly across all tested environments.

4. Summary of Findings

Successfully Working Features

- User Registration
- User Sign In
- Text Translation
- Document Translation (Website Interface)
- Speech Translation via Audio Upload
- Live Camera OCR Translation

Identified Issues

Issues	Description
Document Translator	Document upload not working in Dashboard.
Speech Translator	Microphone button not functioning in Dashboard.

5. Enhancement Suggestion

Transliteration Support for Translated Text

Currently, translated text is displayed only in the script of the target language. This can make it difficult for users unfamiliar with that script to read or pronounce the translated content.

Suggested Enhancement:

Provide an optional **English transliteration** of the translated text along with the translated output.

Example:

Original Text: Hello

Translated (Hindi): नमस्ते

Transliteration: Namaste

Benefits:

- Helps users pronounce translated words correctly.
- Useful for language learners.
- Improves accessibility for users unfamiliar with the target language script.
- Enhances overall user experience.
